Pass Code: boraqs2023

Call for Input

CSTI just completed a research guide aimed at defining key concepts and sustainability principles for green buildings and green infrastructure in each of the 25 sections of the 2022 Draft Building code

Architects

They play a key role in addressing design issues and material choices to mitigate climate change effects and provide best practice in project management.

Quantity Surveyors

They are very critical in advising on costs and quantities. They also provide best practice in contract administration.
